Selected records of pioneers associated with Bay County, which wasn't organized until 1857, seven years after this census was taken.

Due to the handwriting and quality of film, there may be transcribing errors in data captured here. A link to the film is provided above if you would like to review the original information.

History: Saginaw County was organized in 1835, prior to this, it was Saginaw Township, attached to Oakland County. I have not been able to find a map showing the original township geographical boundaries when Saginaw County was formed.
